Astype Stencil

What happens when you cross Futura Black with DIN Stencil Type A?

You might ask this, when you look at our Astype Stencil typeface. The Astype Stencil was created as a finger exercise after working on the DIN Stencil Type A, and it parked in our drawer for a while.

But now, we've opened the drawer to bring you a nice new font as a freebie.

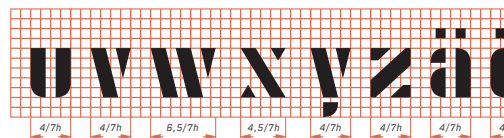

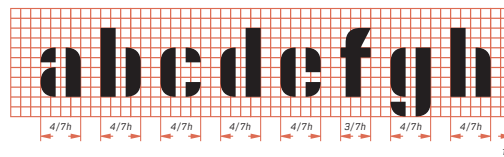

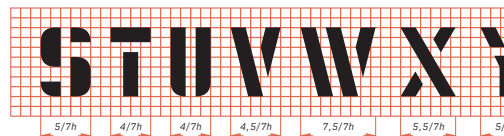

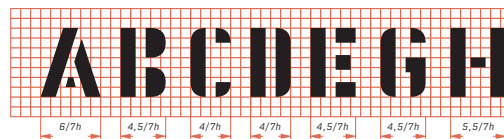

You can download the Basic font style of the typeface for free from our Astype Font Store. Please do not redistribute it - the astype fonts EULA applies. The font is free for both commercial and non-commercial use.

If you want to use the cool alternate glyphs, or need the Cyrillic support, or just like the font so much that you want to support our work, please consider purchasing a license for the Regular font style.

We have tried to give this type design classic a true stencil look with wider bridges. We improved the lowercase and made it more compact, and we think it is one of the best in the field, which is why it is the first typeface to carry our studio name.

Of course, we stand on the shoulders of giants. We bow to Josef Alberts, Joost Schmidt, Herbert Bayer, Jan Tschichold, and Paul Renner.

Have fun and let letters dance!
